
EDUCATION

- 2025 **MIT-WHOI Joint Program in Oceanography, Ph.D.**
Biological Oceanography
Thesis: A Lagrangian Perspective of Mesoscale Biophysical Interactions in the Subtropical Ocean (<https://hdl.handle.net/1721.1/158812>)
Committee: Drs. Michael J. Follows (Advisor; MIT), Stephanie Dutkiewicz (MIT), Amala Mahadevan (WHOI), Colleen Mouw (URI)
- 2018 **Temple University, B.A.** (*cum laude*, top 9% in College of Science and Technology)
University Honors Program; Major: Mathematics; Minors: Physics, Business
Honors Scholar Thesis: Impact of Warm Water Anomalies on Phytoplankton Composition in the Santa Barbara Channel (dx.doi.org/10.34944/dspace/4610)
Committee: Drs. Henry Houskeeper (Advisor; UCSC, WHOI), Raphael Kudela (Advisor; UCSC), Eric Cordes (TU)

RESEARCH POSITIONS

- Massachusetts Institute of Technology**, Department of Earth, Atmospheric & Planetary Sciences
2024 – POSTDOCTORAL ASSOCIATE, Follows Marine Biogeochemical Modeling Group
- Researching the role of mesoscale physical features in shaping phytoplankton abundances using amplicon sequence data from the SCOPE-Gradients 4 cruise and Lagrangian trajectory simulations with Python
 - Running an idealized $1/10^\circ$ MITgcm-Darwin simulation of the North Pacific Ocean and studying phytoplankton community succession along 3D Lagrangian trajectories within mesoscale eddies
- 2019 – 2024 GRADUATE RESEARCH ASSISTANT, Follows Marine Biogeochemical Modeling Group
- Sampled North Pacific microbial communities on the SCOPE-Gradients 4 cruise and examined how fine-scale ocean transport shapes community composition
 - Studied how the fluid dynamical structure of mesoscale eddies affects local phytoplankton concentrations, differentiating features that trap from those actively mixing using satellite remote sensing observations in Python
- University of Southern California**, Department of Biological Sciences
2022 VISITING GRADUATE RESEARCH ASSISTANT, Fuhrman Marine Microbial Ecology Group
- Developed protocols for genomic internal standards, performed DNA extractions, and ran PCR for SCOPE-Gradients 4 cruise samples
- Woods Hole Oceanographic Institution**, Biology Department
2019 VISITING GRADUATE RESEARCH ASSISTANT, Sosik Optical Ocean & Phytoplankton Ecology Lab
- Validated satellite phytoplankton function type algorithms with flow cytometry imagery
 - Processed and extracted chlorophyll samples from SPIROPA research cruises
- NASA Jet Propulsion Laboratory**, Earth Science Division
2018 PROJECT LEAD, NASA DEVELOP National Program
- Led a team of three other early-career researchers, which included assisting with MATLAB and data analysis, and writing weekly progress reports to administrators

- Evaluated environmental and ecological factors driving habitat range shifts for the California grunion, a fish species, with satellite remote sensing observations and in situ citizen science Grunion Greeters data (<https://www.grunion.org/>)
- Developed a predictive model and GUI interface application with MATLAB AppDesigner for local governmental and academic end-users to predict the potential size of grunion spawning events based on input environmental conditions

NASA Armstrong Flight Research Center & University of California, Irvine

2017 INTERN, NASA Student Airborne Research Program

- Quantified changes in phytoplankton community composition and biomass as a response to decadal ocean temperature shifts and environmental fluctuations in the Santa Barbara Channel with MATLAB and satellite remote sensing observations
- Assisted in the operation of instruments onboard a NASA Airborne Science Program aircraft to sample atmospheric chemicals and image land and water surfaces
- Participated in a day-long research cruise measuring water quality in the Santa Barbara Channel

Temple University, Department of Biology

2018 – 2019 RESEARCH ASSISTANT, Kulathinal Evolutionary Genomics & Biological Informatics Lab

- Developed Python scripts to study the evolution of duplicate (“de novo”) genes in the *Drosophila* lineage and their functions
- Updated the open-source website PlayBIGData.org in HTML including increasing functionality and developing educational modules on big data and coding fundamentals

2015 – 2018 UNDERGRADUATE RESEARCH ASSISTANT, Kulathinal Evolutionary Genomics & Informatics Lab

- Implemented command-line software tools and wrote custom Python scripts to study genetic variation and the intensity of natural selection in *Drosophila melanogaster* using a population genomics approach
